Computer technology, such as in the simulated image of light-alloy wheel testing shown above, is also used to achieve the maximum quality of ŠKODA Genuine Accessories products.

ALLOY WHEELS

The Alloy wheels from ŠKODA Genuine Accessories illustrate the combination of quality, functionality and aesthetics. They undergo the same testing as series production wheels, which ensures their high quality and operational safety.

Holds and lasts

Did you know that textile floor mats from the ŠKODA Genuine Accessories range also undergo the "heel test"? This test simulates the action of the driver's foot on the accelerator, sinking the heel 5 mm into the floor mat in both dry and wet conditions at an angle of 45°. The floor mats also undergo an additional load test in the form of a long driving test, and further focus is placed on the brackets fixing the front floor mats to the car upholstery. The tests are designed to verify the proper clip strengths needed to enable comfortable handling by the driver, while keeping the floor mat in place despite the occasional application of force during the drive.
